SCENARIO

FACTORY BLUES

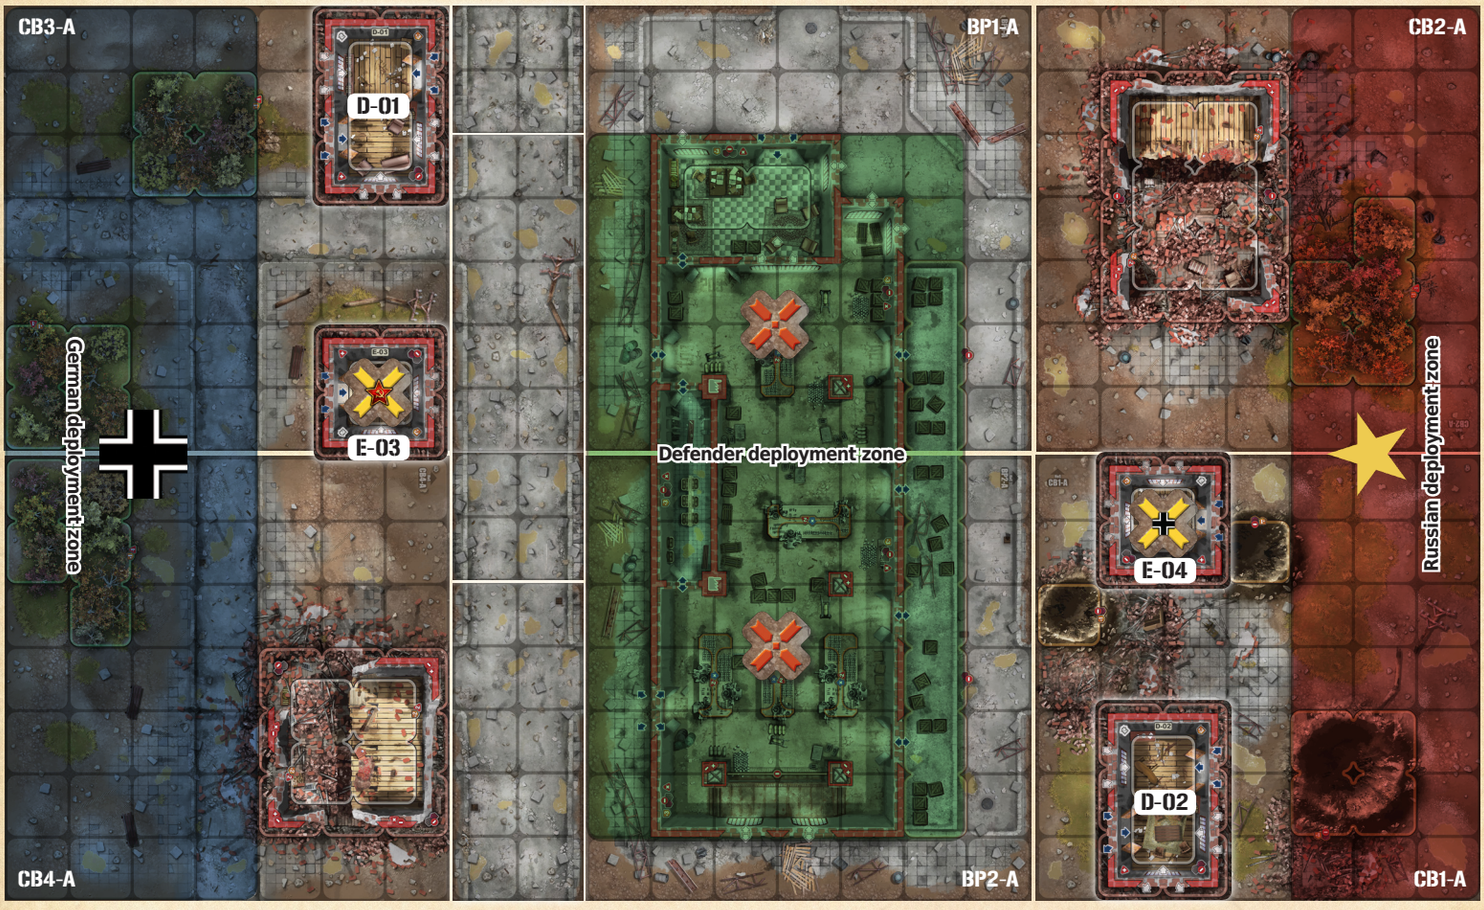

During the Battle of Stalingrad numerous clashes took place to gain control over the factories or what was left of them. One day held by the Russians, occupied by the Germans on the morrow, retaken by the Russians the day after...

1- BATTLEFIELD SET UP AND DEPLOYMENT

Round 1

Round 2 and 3

Roads and terrain boards **CB3-A** and **CB4-A** are added when the German player is attacking in round 2 or 3.

Terrain boards **CB1-A** and **CB2-A** are added when the Russian player is attacking in round 2 or 3.

2- RECRUITMENT OF THE ARMIES

400 POINTS

3- PREPARATION

Both players recruit a **400** point army.

Place **3** secondary objective markers.

Each player draws **4** Action Cards

4- GAMEPLAY

This game is played in two or three rounds of **6** turns each.
At the end of each round:
– none of the eliminated units are returned to this game,
– all reduced infantry units are flipped back over to their unharmed side,
– all heavy vehicles retain any damage counters they might have,
– immobilised vehicles remain in place and keep their current state, same as obliterated buildings.
Start the next round.

Round 1

Russian units enter the board through any square of the side marked with red arrows. German units do the same on the opposite side marked with grey arrows.

Determine initiative at random.
The player with the initiative deploys first.
Place the corresponding initiative marker on space 1 of the turn chart.

5- END OF ROUND 1 AND VICTORY

The player in control of **2** out of **3** objectives at the end of turn **6** wins the round and must be the defender in the next round.
In case of a draw, play on until someone has control over **2** objectives at the end of a Supply phase.

400 POINTS

Round 2
The defender receives between **200** and **400** army points to bolster his forces, the attacker is granted **200** army points more than the defender.
The attacker chooses one of the two factory boards and turns it over to its rubble side.

Place a primary objective on the intact factory board.

The attacker places his two deployment zone terrain boards adjacent to the side of the factory as shown on the map.
Use **CB3-A** and **CB4-A** and the roads if the German is the attacker and **CB2-A** and **CB1-A** if it's up to the Russians to attack.
Also place **2** houses on the board, as indicated on the map.
The defender's units are deployed in the green zone.
The attacker's units are deployed in his deployment zone.
The attacker has initiative, the defender deploys first.
Each player draws **4** Action Cards.

5- END OF ROUND 2 AND VICTORY

The attacker wins the round if he controls the primary objective at the end of turn **6**. He shall be the defender in round **3**.
If neither player or the defender controls the primary objective at the end of turn **6**, the defender wins the game.

Round 3
The defender receives between **200** and **400** army points to bolster his forces, the attacker is granted **200** army points more than the defender.
The remaining intact factory board is now turned over to its rubble side as well.
The player who defended in Round **2** now also places his two deployment zone terrain boards adjacent to the side of the factory as shown on the map. Add **CB3-A** and **CB4-A** if the German was the defender or **CB2-A** and **CB1-A** if the Russians had to defend during round **2**.
Also place **2** houses on the board.

Place 1 Russian secondary objective and one German secondary objective in the little houses.

The defender's units who survived Round 2 are deployed in the green zone.
The units acquired with army points allocated in Round 3 are placed in the appropriate deployment zone.
The attacker's units are placed in the appropriate deployment zone.
The attacker has initiative, the defender deploys first.
Each player draws **4** Action Cards.

Goal is to score the most Victory Points.

A player who controls his proper army secondary objective scores a 5**0** point bonus.

5- END OF GAME AND VICTORY

The player who scores the most **Victory Points** at the end of turn **6** wins the **game**.
The defender wins the **game** if neither player controls the **objective** at the end of turn **6**.
