Players must score as many points as possible at the end of the game, by getting their units across the river.

## 5- END OF GAME AND VICTORY

At the end of the 6th round (or of the current game round at the end of regulation game time), each player scores 1 point per unit of his army having crossed the river (regardless of the type of unit), and 2 points per officer.

The player who has scored the most points wins the game with a Victory by Objective (3 points in the standings).

If a player completely destroys the other player's army, he wins a Victory by Elimination (2 points in the ranking).

In the event of no victory at the end of the 6th game round or (or of the current game round at the end of regulation playing time), a draw is declared (1 point in the standings for each player).

The losing player is not awarded any points in the standings.
