THE BUNKER

June 1944 :
American observers spotted an abandoned bunker close to the beach.
A Godsend, just perfect to use as a solid defensive position and expand operations from there. An assault group is sent to capture and secure it at once.

Horrified, the German high command notice a gaping hole in their defensive line : one outlying bunker has been left ungarrisoned.
It must NOT fall into enemy hands and, once taken, shall be of great use to thwart their actions to form a bridgehead beyond the beach.
Without delay several units are dispatched to take up positions in the bunker.

Soon both sides are locked in battle and ask for reinforcements. Then things get worse...

Composition of the armies :

German forces : 400 army points to spend freely (+/- 20 pts)
US forces : 400 army points to spend freely (+/- 20 pts)
German reinforcements : 200 army points to spend freely (+/- 10 pts)
US reinforcements : 200 army points to spend freely (+/- 10 pts)

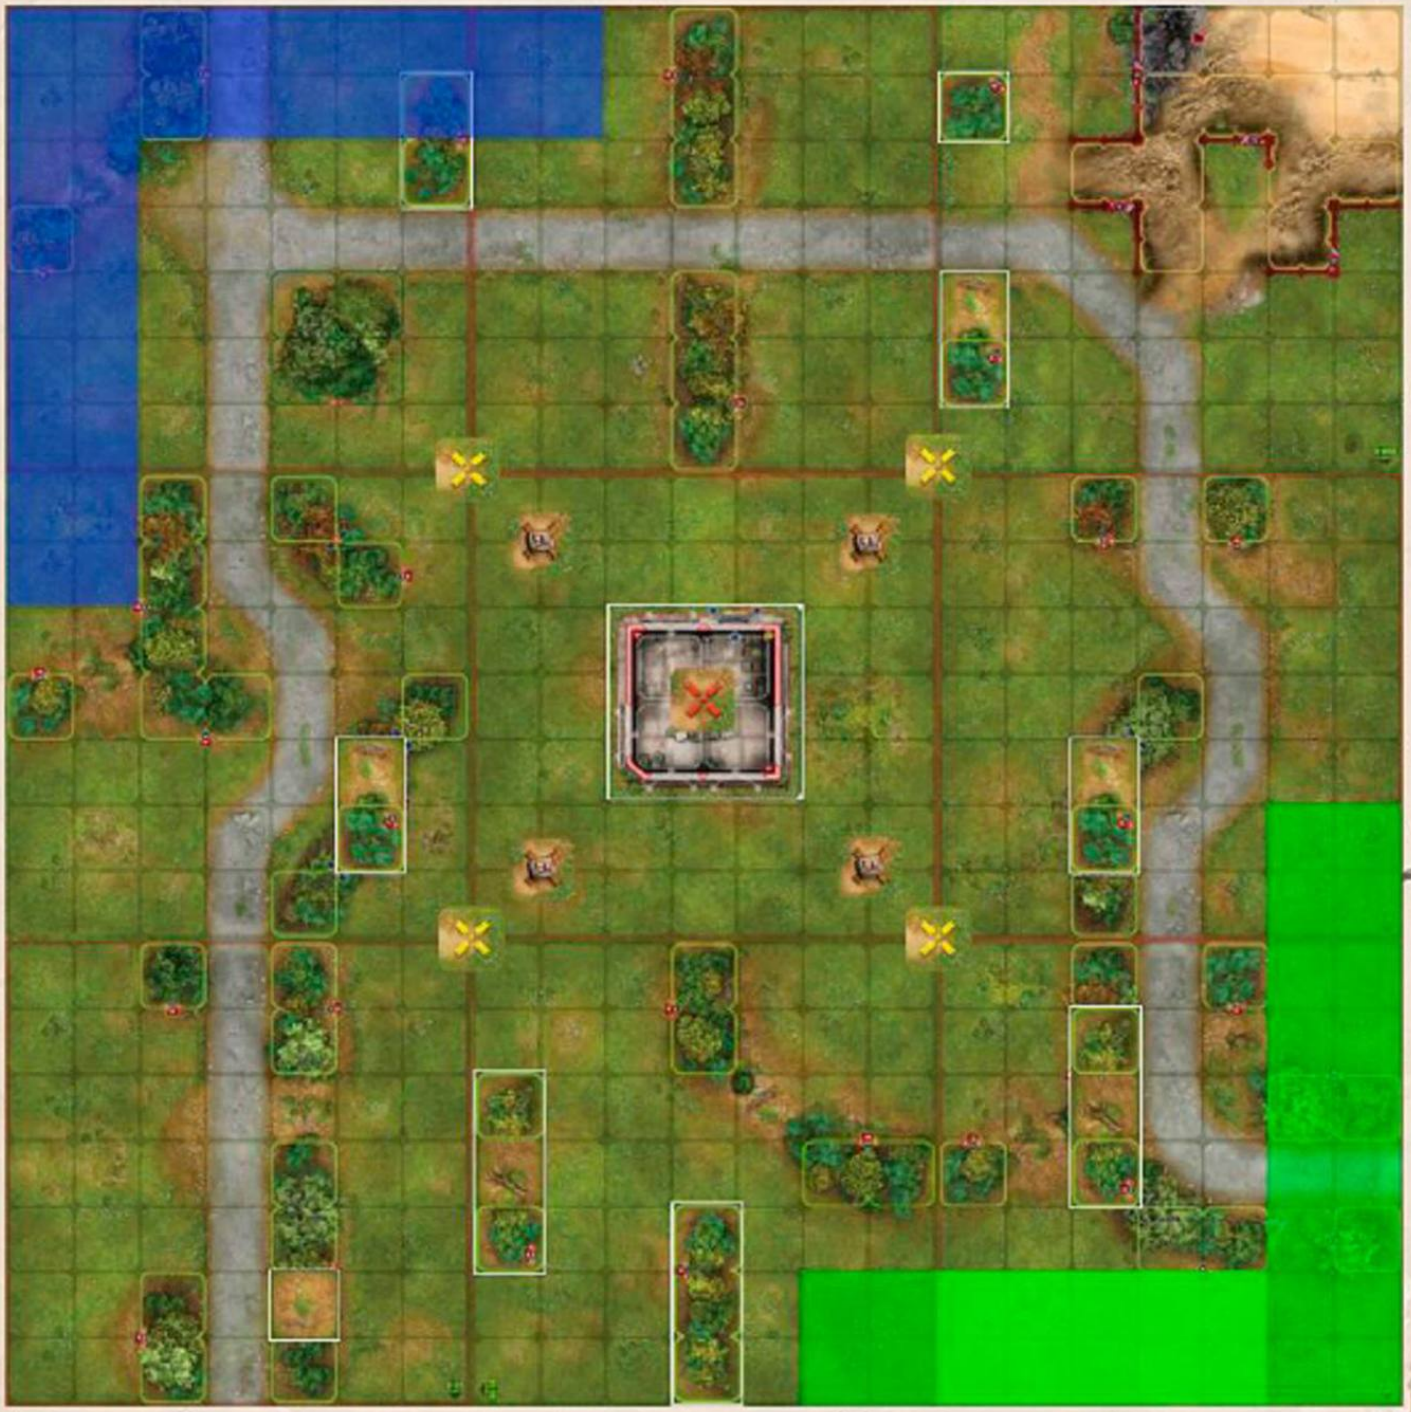

Victory Conditions and Particular Information :

Set up :
-Make a disperse roll to determine which direction the bunker's entrance will be facing. Roll again on 5 or 6. Then place the bunker with its entrance facing in accordance with the obtained result.
-Both sides remove **Artillery** and **Aviation** cards from their decks.
-Roll a die to determine initiative. The player who has initiative deploys first.
-The US player deploys in the green zone, the German player deploys in the blue zone.
-All reinforcements come into play during the fourth turn at the edges of their deployment zone. They can enter in the activation phase with an order, or during the supply phase.
-The game lasts for 8 turns.

Victory goes to the side with the greatest amount of victory points. Points are scored for eliminating units as well as for holding on to locations. Scores are checked after each supply phase :

-Eliminated units : check VP on recruitment tiles
-Main objective (the bunker) : 15 PV
-Secondary Objective : 5 PV
