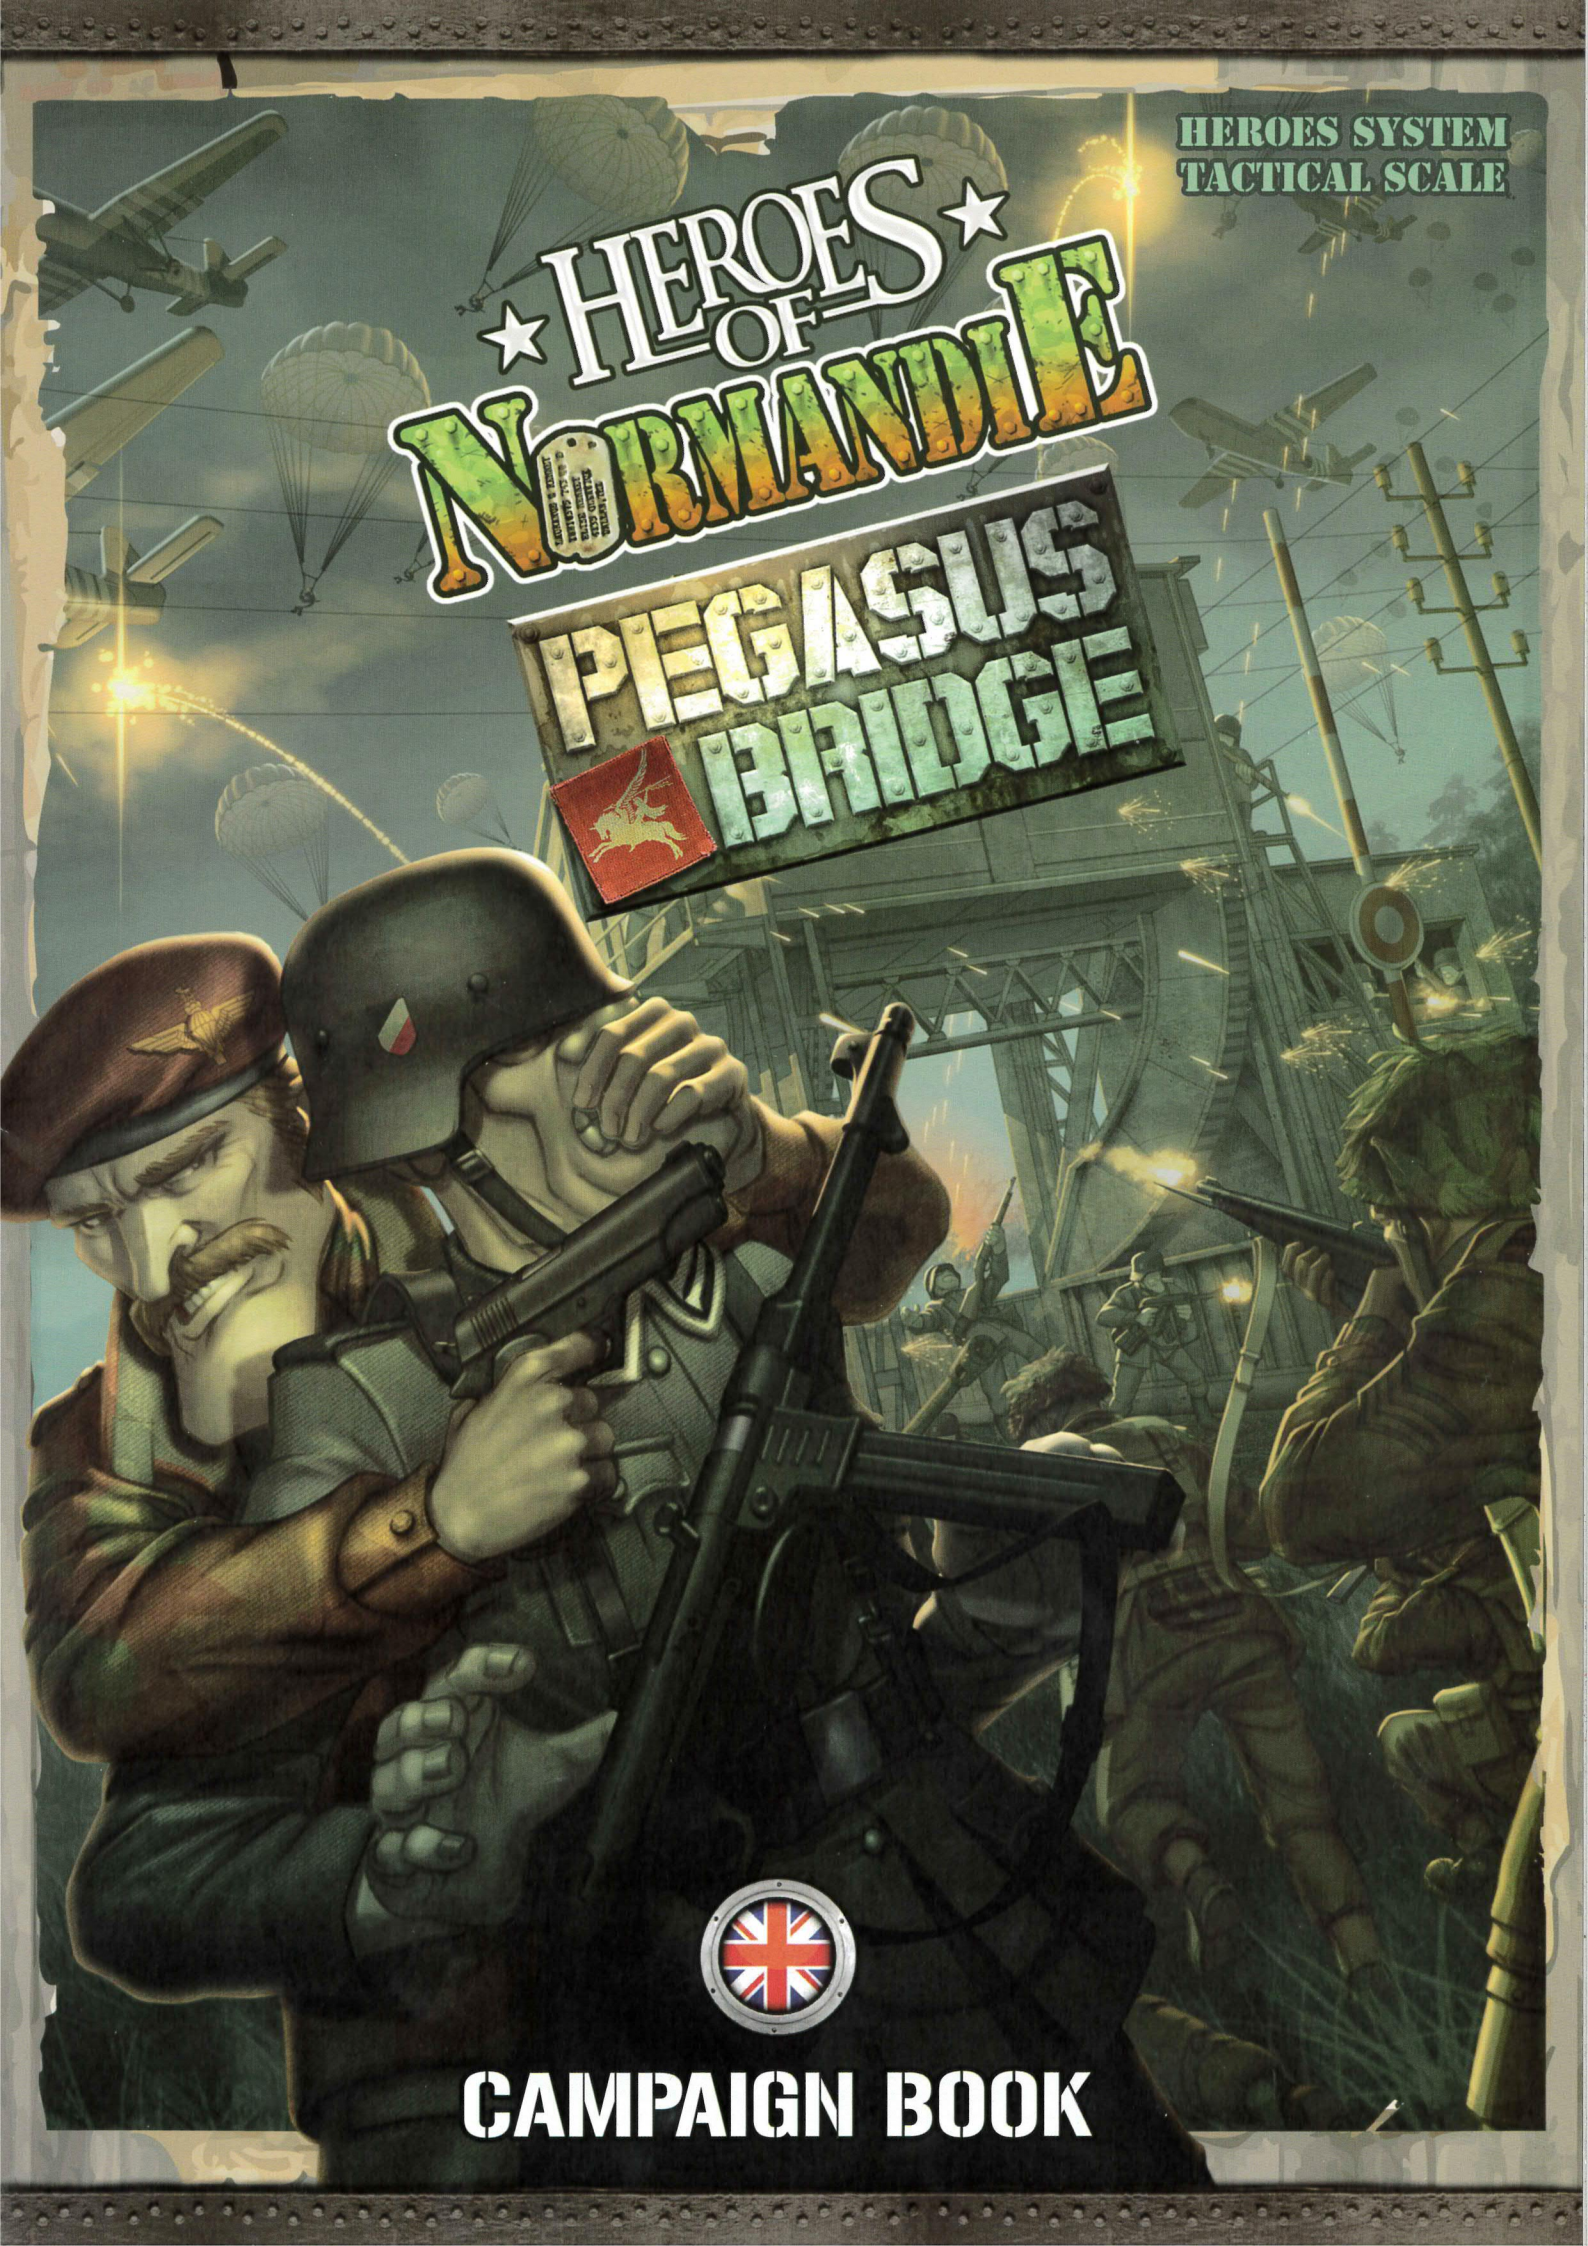
HEROES OF NORMANDIE

PEGASUS BRIDGE



CAMPAIGN BOOK

CRÉDITS

Heroes of Normandie, Heroes System (tactical scale) is a game system conceived by Yann & Clem.
Graphics and illustrations: Yann, Clem, Alex, Olivier Derouetteau, Pixel Vengeur, Stan
Scenarios: Clem
Flavor text: Laurent Duclos
Playtesting: Axel, Jujubinus, Seb, Netice, Ripjeck, JM, Yann & Clem
Proofreading (French): Seb, Yannick Gros
Editing (French): Camille
English translation: Nathan Morse
English proofreading: Sam DiRocco

NOTES

Heroes System tactical scale™, Heroes of Normandie™, all the images and illustrations of the game and the Devil Pig Games™ logo are the properties of the company Devil Pig Games.
Commercial use is forbidden without the express consent of Devil Pig Games.

You can also share your own creations there with the Heroes of Normandie community

WAR FOR DUMMIES

OPERATIONS TONGA & DEADSTICK

- Hey, Grampa, here's your pipe!
- Oh! So, you still want a story!
- Oh yes, Grampa, the English and the horse with wings!
- You mean Pegasus Bridge, eh? Huh. If someone had told me that one day I'd have to speak well of those limey rosbifs...

THE WHY AND THE HOW

As part of the invasion of the continent this 6th of June, 1944, the British have a heavy responsibility to insure that the left flank of the Allied attack aligns with the greater vision of seizing the important city of Caen. The first operation is dubbed Tonga. On the eastern flank, the Orne and a canal that connects Caen to the sea. Both waterways are notably crossed by two bridges: one over the Caen Canal at Bénouville (Euston I, renamed later to Pegasus Bridge in honor of the insignia of the 6th Airborne), and the other over the Orne at Ranville (Euston II, renamed later to Horsa Bridge in honor of the gliders). Their capture is critical for blocking the avenues that facilitate a German counterattack, and so this operation is named Deadstick (or Operation Coup de Main — so British). The 6th Airborne of Major General Gale, to whom the mission has been entrusted, must also neutralize the battery of Merville, supposedly equipped with 150mm cannons, capable of shelling the beaches (notably Sword Beach). Finally, they must blow up five other smaller bridges east of the Orne, always with the goal of making things difficult for the Germans.

HAM & JAM

In the weeks preceding the assault, the men of Company D of the 2nd Ox & Bucks of the 6th Airlanding Brigade trained hard under orders by Major Howard. As with the rest of the preparations for Operation Overlord, the Allies went all-out. So, replicas of the bridges were constructed in England for the hundreds of volunteers to train, day and night, in conditions as close as possible to the real deal.

When the time came on June 5, 1944, six Horsa gliders flew overhead, drawn by Halifax bombers. Crossing the channel is business as usual, and the gliders are released around Cabourg to glide to their objectives. Three gliders head toward the Bénouville bridge (Euston I, Landing Zone X), and succeed in the incredible feat of landing in the dead of night, in unknown enemy territory, with nearly no sophisticated instruments beyond a compass and a few wristwatches, within 50 meters of the bridge. It brings a tear to my eye!

Both bridges are guarded by units detached from the 716th ID of the Wehrmacht, a static division installed for quite some time in the sector; their heavy equipment was mostly captured from the enemy (French and Czech cannons), and integrated into the casemates of the coast. This unit is largely composed of Ostruppen or older soldiers, without much experience and with limited combat capability. In addition, numerous soldiers from this division were offered a lovely holiday on the Eastern front, which was hungry for cannon fodder, and the 716th ID, sprinkled over the sector, is at no better than 50 % of its theoretical effectiveness.

The fact remains that at 00:25, the Germans are thoroughly surprised. There is nothing but the sound of the rough landings of Major Howard's gliders, which is mistaken for the crashing of a bomber that would have gone down after the diversionary bombing organized later by the English.

Recovering from their emotions (a glider assault into the middle of nowhere does not tend to keep one's nerves cool), the British soldiers progressed toward the bridge and silently "neutralize" the first sentries (in military jargon, "neutralize" is a euphemism that means "bleed like a pig").

A little further on, the guards, intrigued by the noise, come out of their billets to find themselves face-to-face with the commandos, who open fire immediately. The alarm has been triggered.

The Germans react quickly... and badly. It's one of those panicked, disorganized situations that the experts commonly characterize as a SNAFU. Flares firing off, STEN bursts, smoke grenades, phosphorous grenades; it takes 10 minutes for the the English to become masters of the Bénouville bridge, which they were surprised to discover was not rigged with explosives.

At Ranville (Euston II, Landing Zone Y), the results are a little less self-evident. One glider landed about 150m from the bridge; another, approximately 1.5km; and the third, 10–12km out. So with fewer than 30 men, Lieutenant Fox of platoon 17 seized the bridge over the Orne, facing Germans that were certainly alerted by the sound of combat from Bénouville, but overwhelmed quickly nonetheless.

Results of the operation: two killed and fourteen wounded British. Both bridges are under Allied control, and Major Howard sends a carrier pigeon with the codewords Ham & Jam (I know, right?) to inform the Allies that both bridges were taken intact.

Now they just needed to wait for their relief.

Amusing historical note: The first French house liberated by the Allies would be La Chaumine café near the bridge, a pub. Vive la France!

Blue Bonnets Over the Border

The tune that Lord Lovat asked Bill Millin, his personal bagpiper, to play in *The Longest Day* is called "Blue Bonnets Over the Border". What the film does not say is that this tune is alluding to the white cockade on the blue bonnet that identified the Jacobite Scots, who (violently) supported the Catholic Stuart family's claims to the throne of England against the Orangemen / Hanoverian Protestants from the late 17th Century through the 18th Century. Basically, a family tale.

March, march, Ettrick and Teviotdale,
Why the deil dinna ye march forward in order?
March, march, Eskdale and Liddesdale,
All the Blue Bonnets are bound for the Border.
Many a banner spread
Flutters above your head,
Many a crest that is famous in story.
Mount and make ready then,
Sons of the mountain glen,
Fight for the Queen and the old Scottish glory.
Come from the hills where your hirsels are grazing,
Come from the glen of the buck and the roe;
Come to the crag where the beacon is blazing,
Come with the buckler, the lance, and the bow.
Trumpets are sounding,
War-steeds are bounding,
Stand to your arms then, and march in good order;
England shall many a day
Tell of the bloody fray,
When the Blue Bonnets came over the Border.

THE NIGHT WILL BE LONG

The English think that it won't take long for the Germans to react, and Howard reinforces the Bénouville bridge with a group of men entrenched in Ranville who, from their side, will gather the other English soldiers scattered during the landings.

On the German side... nothing. Or pretty much. There are quite a few German units around, but they had been warned that there would be exercises firing blanks that night on the theme of pushing back an enemy commando (is fate just teasing them, or what?). As it turns out, just a pair of light tanks come to take a peek, and one of them is quickly taken out of the running.

Over the course of the night, the Germans grope without much determination. But as dawn approaches, the pressure increases. The English positions become the targets of mortar fire, and the wounded begin to accumulate. By mid-morning, three German river vessels from Ouistreham appear before the bridge. Two were destroyed, but the third managed to turn back. A little later, a german bomber managed to drop a bomb directly onto the bridge... and the bomb bounced into the canal without exploding.

It's 12:32, two minutes behind schedule, and the bagpipes sound that the English and a few French from the 1st Special Service Brigade of Lord Lovat are joining up with Howard's men.

Operation Deadstick is a complete success, with an improbable helping of good luck.

War, Cricket and Marmelade

While the Americans give their operations and procedures powerful, pounding names like Overlord, Cobra, or Flash & Thunder, the English prefer more picturesque names like Tonga, Goodwood, Epsom, or Ham & Jam (What an awful combination! Are these people monsters?!). Just what is this supposed to tell us about the difference in attitude of the two armies?

Well, I guess that the English are simply crazy by nature. No offense!

NEW RULES

NIGHT COMBAT

In the scenarios set at night, the maximum range, the penalty for shooting at long range, the dispersions, and the range for revealing concealed units are modified according to the conditions of the night (Dark Night or Clear Night).

Dark Night

The maximum range for shots is **7** spaces. Beyond this distance, it is impossible to fire.
The penalty for long range starts at **5** spaces.
The maximum range of **7** spaces also applies to the Limited Range special ability if it is greater than **7** spaces.

In order to discover a unit hidden in a terrain overlay, you must be adjacent to it.
A unit can hide in open terrain (outside of a terrain overlay) if no enemy is within **2** spaces with a clear **LoS** on the hidden unit.

Dispersion from indirect fire is augmented by **2** spaces.

No direct fire with the Indirect Fire special ability.

The range of indirect fire is not affected.

It is impossible to play **Aviation** cards.

Clear Night

The maximum range for shots is **9** spaces. Beyond this distance, it is impossible to fire.
The penalty for long range starts at **7** spaces.
The maximum range of **9** spaces also applies to the Limited Range special ability if it is greater than **9**

In order to discover a unit hidden in a terrain overlay, you must be adjacent to it.
A unit can hide in open terrain (outside of a terrain overlay) if no enemy is within **4** spaces with a clear **LoS** on the hidden unit.

Dispersion from indirect fire is augmented by **1** space.

The range of indirect fire is not affected.

It is impossible to play **Aviation** cards.

The Sun Rises...
In certain scenarios, the darkness of the night can change, and the sun can rise. Special markers permit you to indicate these changes on the turn counter.

Flames and Light Sources
Light Sources and Flames illuminate all adjacent spaces.
Whenever you shoot at units in one of these illuminated spaces, apply the firing rules from the rulebook in the base game.
This even applies to discovering hidden units that are situated in the illuminated spaces.

SLEEPING UNITS

Certain units start the scenario sleeping.
These are indicated by the Sleeping marker.

Deploy them on the gameboard by placing the Sleeping marker on them.
Deploy them with their "inactive" side showing, if they have one.
They can neither receive Order tokens nor Activated markers, nor can they be moved during the Supply Phase.
Sleeping units cannot benefit from the effects of an Action card.

A sleeping unit cannot be targeted by a shot unless the enemy unit is within **2** spaces of the sleeping unit.
If the sleeping unit is in a building, it cannot be targeted by a shot unless the enemy unit is adjacent to the sleeping unit. In any case, a sleeping unit is obviously still affected by blast patterns.

A sleeping unit that is attacked as part of an Assault is automatically eliminated.

When shot, sleeping units suffer damage normally.

A unit sleeping outside (not in a building) wakes up as soon as a shot or explosion rings anywhere on the terrain.

A unit sleeping in a building wakes up whenever:
- A shot is taken either from a space inside the same building, or from a space adjacent to the building.
- The Destruction ability is used in or a blast pattern overlaps either the same building, or a space within **5** spaces of the building.
- An Assault takes place in the same building.

A unit with an Order can wake a sleeping unit if they are adjacent at the end of its movement.

Once awake, the unit loses its Sleeping marker, but immediately receives a Suppressed marker. It loses the Suppressed marker at the end of the Supply Phase of the current turn, or if an Action card or a special ability removes it.

GREAT DEFENSIVE POSITION

If the blast pattern is centered on the central interspace of the great defensive position, the units inside the defensive position do not benefit from the defensive bonus the defensive position usually confers.
An enemy unit that moves from one space of the defensive position to another space of that same defensive position can be the target of opportunity fire from another unit in that same defensive position.
Remember: A unit with a Suppressed marker no longer exerts **ZoC**.

BUNKER

These terrain overlays function like other buildings, except that they cannot be destroyed, and no unit can enter through the windows except by using a card or special ability.

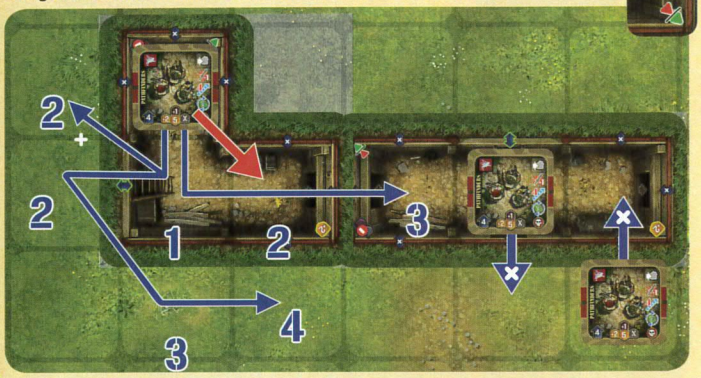
The units, Equipment, or blast patterns with the Demolition special ability can try to knock out the units inside the bunkers by firing either directly at them or the bunker itself. Roll a number of dice corresponding to the value indicated in the symbol. If you roll at least a **6**, place one (and only one) Suppressed marker on each unit in the bunker. Hidden units are not affected.

VICKERS MACHINE GUN

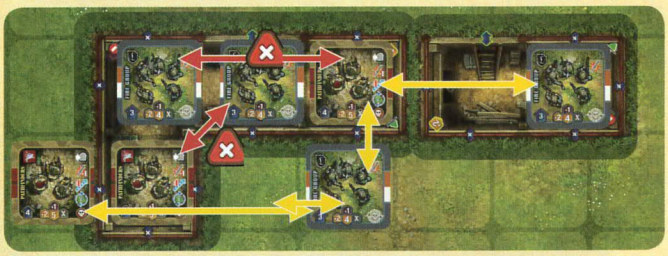
TRENCHES

A unit that enters or leaves a trench must end its movement, unless this is by way of a trench border with a ladder.

Moving within a trench, or passing from one trench to another adjacent trench does not end movement, as long as the borders between the trenches form a **passage**.
Diagonal movement is not allowed inside trenches.



Infantry units in a trench block **LoS** for other infantry units in the trench, but not the **LoS** of infantry units outside the trench. The corners of the trench block **LoS**.

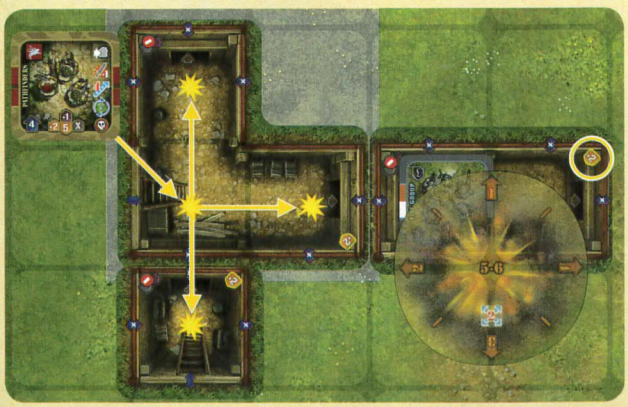


The **ZoC** of a unit outside a trench does not affect units in the trench. The **ZoC** of a unit in a trench is limited by the trench.

If a unit is in a space adjacent to a trench, it can launch a grenade into it, on a space (not an interspace). The explosion propagates only in a straight line, 1 trench space in every possible direction from the target space. The units in the blast do not benefit from the defensive bonus normally granted by the trench.

The trench contains the explosion, so it does not affect spaces outside the trench.

Units under a blast pattern, but in a trench, are still affected, but benefit from the defensive bonus granted by the trench.



NEW SPECIAL ABILITIES

Urban Combatant
The unit can enter or exit a building by any opening (door or window) indicated by a blue or white arrow. This does not enable it to enter bunkers.

Defender
This unit gives a **+1** defense bonus to infantry units (of the same army) in the spaces adjacent to it. If the unit with this ability is killed, the effect of this special ability persists throughout the activation in progress.

Medic
In order to activate this special ability, you must flip over your unit during a movement.
You can only flip over a unit once per movement, at the beginning or end of the movement. This movement can be zero.

The **Medic** can put the Aid marker on an infantry unit that has just taken a hit, anywhere on the battlefield.

Ignore the damage taken by the unit, and place the Aid marker on it, as well as a Suppressed marker. As long as the unit has the Aid marker, it cannot budge, and cannot remove the Suppressed marker. If it takes another hit, apply it. Thus, it can be eliminated before getting treated.
You can only have one Aid marker per Medic.
You can transfer the Aid marker to another infantry unit. The unit that lost it suffers the damange it had previously avoided.

In order to remove the Aid marker, all of the following must be true:
- The Medic must be adjacent to the unit.
- The Medic must not already have been activated (Order token or Activated marker).
- The Medic must be showing its “active” side.

The marker can be removed in either the Activation Phase or the Supply Phase. In the latter case, not having been activated and not having moved allow it to remove the marker.

Once the Aid marker is removed, flip the **Medic** back to its “inactive” side.

The treated unit will be able to discard the Suppressed marker in the next Supply Phase.

NCO :
This unit is a noncommissioned officer or has one in it.
If the unit has not been activated, it can remove 1 Suppressed marker to another unit within 3 spaces of it.

NEW EQUIPMENT

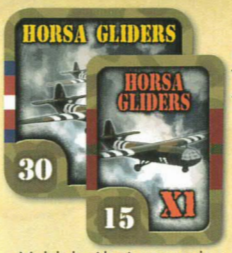
Camo
This option gives you **3** Camo markers.
Discard a Camo marker to give an infantry unit a **+1** defensive bonus.
You can use as many Camo markers as you want in a single attack, but you must announce how many BEFORE your opponent rolls the die.
This option will not protect a unit from a blast pattern.
Discard the marker after use.

Excelsior Welbike
This option gives you **1** Excelsior bike marker.
Give this marker to a unit of your choice (from the same recruitment tile) during deployment of the unit. Its movement value is now **6** spaces.
If the unit is eliminated, leave the Excelsior bike on the space, and any other unit (an ally or an enemy) can stop on the space to take it.
The unit can also decide to get off it during its movement, but leaving the marker on the destination space or the starting space (of course, in this case it doesn't get the bike's movement value).

Flares
This option gives you **3** Flare markers.
Instead of firing normally, you can fire a flare a maximum distance of **7** spaces.
The flare marker illuminates the **8** spaces adjacent to it.
Firing on a unit in an illuminated space uses the firing rules of the rulebook in the base game.
In the following Supply Phase, flip over the Flare marker, then in the next Supply Phase, remove it.

Gammon Grenade
This option gives you **3** Gammon Grenade markers.
Use this option like a grenade. You can choose the power of your Gammon Grenade at the moment you use it. Do this by choosing which side of the marker is face-up.
One side of the Gammon Grenade marker targets an interspace, and the other side targets a single space.
The attack bonus varies from one face to the other.
Discard the marker after use.

Glider #4
Staff Sergeant Lawrence, piloting Glider #4 en route to LZ Y and the Ranville Bridge, has confused the canal and the Orne with two other parallel rivers, the Dives and the Divette; he landed a little hard about a dozen kilometers from his initial objective. As a result, Platoon 22, led by Lieutenant Hooper, stormed the bridge over the Divette, unaware that they were taking the wrong bridge. Once they realized the mistake, they painfully marched to join their comrades entrenched at Ranville.



Glider
This option gives you 1 or 2 Glider tokens.

Each glider has the ability to transport (see Transport Special Ability in the rulebook from the base game).
Vehicle that occupies a single space uses all of the transport points of a glider.

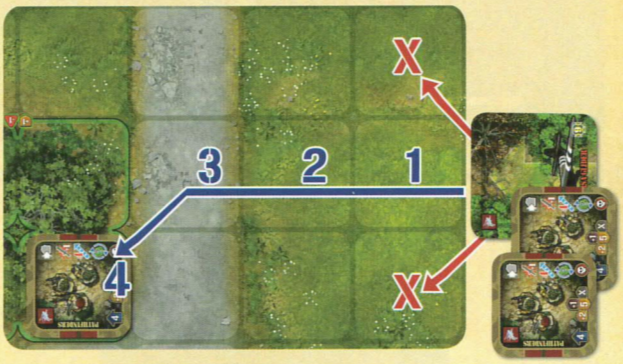
Vehicles that occupy two spaces cannot be transported by gliders (with the exception of the English Tank Tetrarch Mk VII, which uses all of the transport points of a glider).

During the Deployment Phase, you can place your Glider tokens anywhere around the gameboard.

Place each one facing a space accessible to the units it is transporting. Place the units it's carrying on top of it (without exceeding its transport value).

If this is Equipment (attributed to a recruitment tile), the units must also be part of the recruitment tile to which the Glider option is attached. These units can be selected from among all of your units if the Glider option is attributed to a command tile.
These units will be able to enter the battlefield at the space at which the arrow points, with an Order token or during a Supply Phase.

The units in the glider cannot fire until they have entered the game.



The Order(s) special ability of officers still apply even if they are inside the Glider.

If the space where the units are supposed to exit the Glider is occupied by an enemy unit, and no units in play can free up the space, you can either:
- Give an Order token to a unit in the Glider and carry out an assault. If the assault is a failure, the attacking unit withdraws back into the Glider (if it survived).

or
- Drop a vehicle from the Glider to park in the occupied space in order to drive out the enemy unit.

If no unit in the Glider can mount an assault, and there is no vehicle in the Glider, the units in the Glider are stuck as long as that space is occupied.

Hawkins Mines
This option gives you **3** Hawkins Mines markers. If one of your infantry units is adjacent to an enemy vehicle or a building at the end of its movement, it can place **1** marker on the vehicle/building.
This movement must be during the Activation Phase.
If the vehicle moves, it takes the marker with it.
This explosion does not have an area effect.
With several units, it is possible to place more than **1** marker on the same vehicle or building.
At the start of the Supply Phase, the mines explode.
If there are several, add their combat values or their destruction values, then make a single die roll. Remove it and discard it.
If it is a heavy vehicle, use its lateral defense value.

Knife
This options gives you **3** Knife markers. Discard a Knife marker to add a **+2** bonus on your result during an assault.
You can use as many Knife markers as you want during a single attack, but you must announce how many BEFORE rolling the die. Discard the marker after use.

"Thermos" No. 73 Grenade
This option gives you **3** Thermos Grenade markers.
Use this option like a grenade.
Discard the token after use.

Sentinels-Decoys
This recruitment tiles gives you **2** Sentry unit tokens and **1** Decoy token.
Deploy these tokens like normal units with their "hidden" side face-up (verify the ambush conditions).
The Decoy token can receive Order token, or move in the Supply Phase.
If a Decoy token is revealed, remove it from the game.

Major John Howard (Distinguished Service Order, Croix de Guerre avec palmes from France)
One does not capture a bridge by assault in the dead of night by landing a wooden airplane with no motor if one does not have an impressive résumé. Reginald John Howard is born in 1912, eldest in a family of nine children, growing up in London. His father is not only a "working class hero", he is also a war hero, having survived the trenches of the First World War. A diligent Boy Scout, Howard is also a conscientious student, who is promised a secondary education — not something to which everyone had access at the time. But times are hard, and he has to help papa and mama keep the pot boiling. Also Howard, at the age of 14, starts to work full time as a clerk in a brokerage firm. He loses his job in 1931 (_) and joins the ranks of the Army of His Majesty King George V in 1932. He gets great results on exams, and starts his career as a sports instructor and company clerk for the King's Shropshire Light Infantry Regiment (perhaps we will take the time, someday, to review the abominable subtleties to the organization of the British Army regiments). He tries to get an officer's commission, which is refused, but he is promoted to the rank of Corporal before being returned to civilian life in 1938, and he joins the Oxford police.
War imposes, he rejoins his regiment in 1939, and climbs quickly through the hierarchy (funny how things accelerate in certain circumstances...), passes the exams to become an officer, and finds himself 2nd Lieutenant in the 2nd Battalion of the Oxfordshire & Buckinghamshire Light Infantry (Ox & Bucks) — a unit which he will never leave, and a unit which will remember him as a leader who is as demanding as he is competent.
His hour of glory comes one certain night of June, 1944.
In 1944, he is the victim of a serious car accident, and in 1946 he has to leave the army. So, he joins the Ministry of Agriculture, where he spends the rest of his career. He died in May, 1999. An amusing trivium: Richard Todd, the actor who played his role in The Longest Day, was himself a member of the 7th Parachute Battalion of the 6th AD, which had been sent to reinforce Howard's men.

NEW CHARACTER TRAITS

Dropped (Parachuted)
With this option, either at the moment of deployment or when the reinforcements arrive (depending on the scenario), you can parachute the infantry units from the recruitment tile to which this option is attached.
You must parachute ALL the units from this recruitment tile.
You cannot attribute light or heavy vehicles or cannons to this recruitment tile.

You cannot attribute light or heavy vehicles or cannons to this recruitment tile.
For each unit, choose an interspace anywhere on the battlefield. Place a blast pattern on the interspace so it points at the diagonals, then roll the die for dispersion.
In the event of dispersion (any result other than 5 or 6), the unit lands in the space indicated by the die roll. This dispersion is unaffected by Night modifiers.
On a roll of 5 or 6, choose in which of the four spaces the unit lands.

If the unit is deployed with an Order token during the Order Phase, it receives a Suppressed marker and can act.

If the unit is deployed during the Supply Phase, it does not receive a Suppressed marker, but cannot act before the following turn.

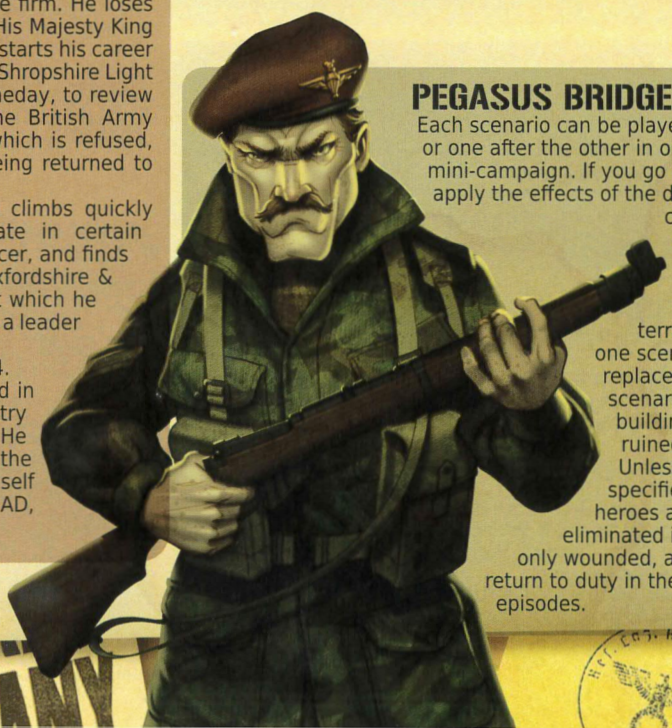
A unit with the Ambush special ability can be placed with its "hidden" side face-up.
A unit with a special ability requiring activation (Tripod, Medic, Opportunity Fire...) must be placed with its "inactive" side face-up.

The unit is eliminated if it leaves the gameboard, or lands on a Structure (building, bunker...), a terrain overlay that is normally forbidden (e.g. a Water space without having the Amphibious special ability), or an enemy unit.

If the unit lands on a space containing any other terrain element than those listed above, it receives a second Suppressed marker.

If the unit lands on a friendly unit, put it an adjacent space of your choice. Both units receive a Suppressed marker.

Walking Fire
This option gives you **3** Walking Fire markers.
A unit can spend a Walking Fire marker to use the Firing on the Move special ability with a **−1** penalty.
A unit that already has this special ability with a **−2** penalty can also use a Walking Fire marker to improve its special ability.
Discard the marker after use.



PEGASUS BRIDGE

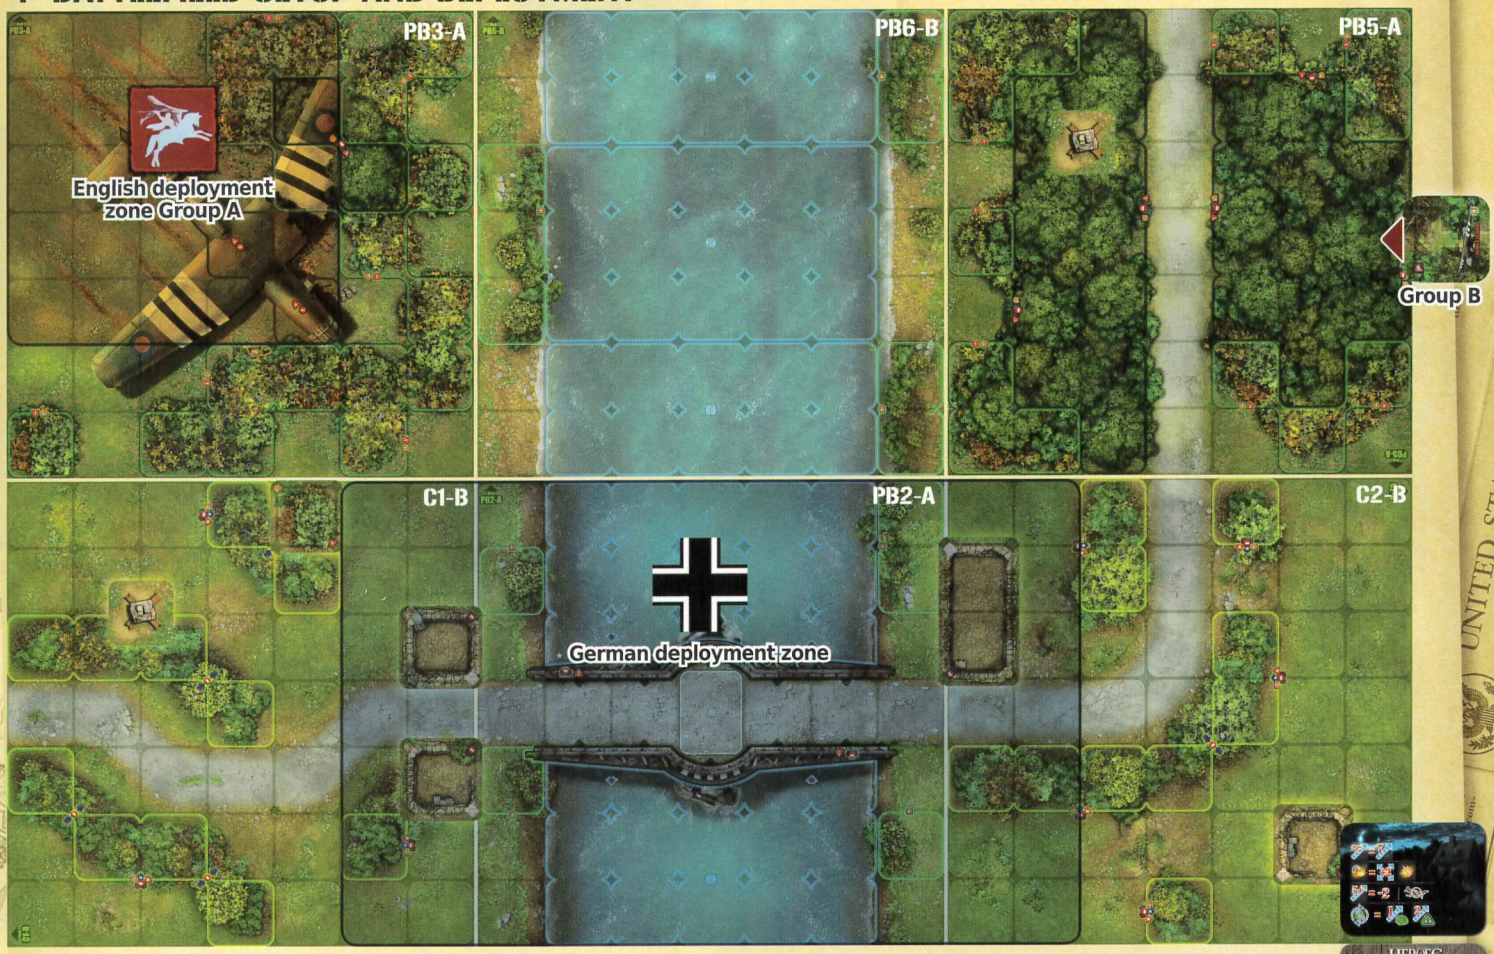
Each scenario can be played independently or one after the other in order to compose a mini-campaign. If you go with the campaign, apply the effects of the different victory conditions; otherwise, ignore them.
If you play the campaign, terrain destroyed in one scenario will not be replaced in the following scenarios, and destroyed buildings remain on their ruined side.
Unless the scenario specifies otherwise, heroes and officers eliminated in a scenario are only wounded, and are able to return to duty in the subsequent episodes.

SCENARIO 1 - BRIEFING

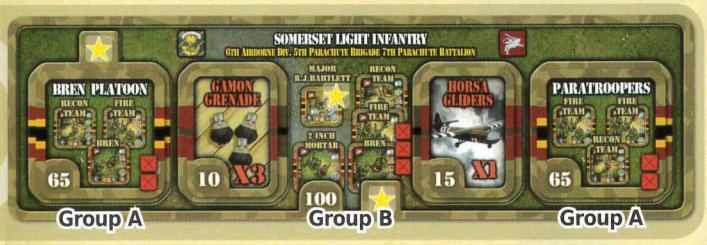
ORNE RIVER - HORSA BRIDGE

The mission: "Capture the two bridges over the Orne and the Caen Canal, at Ranville and Bénouville... The capture of these two bridges, which we will call Operation Deadstick, relies heavily on the element of surprise, rapid execution of the operation, and determination to prevail. You must expect a counter-attack; hold the position until relief arrives."

1- BATTLEFIELD SETUP AND DEPLOYMENT



2- RECRUITMENT OF THE ARMIES



3- PREPARATION

Deploy the German units in the German deployment zone.

The English player deploys the units of Group A in the corresponding deployment zone, and can bring the units of Group B into play by the space adjacent to the Glider token.

Without looking at them, place **2** Bonus tactic markers.

Remove the following cards from both decks:
Weak Point, Bogged Down, It Bounced Right Off It, Hit and Run, Ram, Don't Stop!, Repairs, Surprise!, Precision, all the **Artillery** and **Aviation** cards.
Also remove the German cards Hitlerjungen and Booby Trap.

The English player has initiative.
Place the corresponding marker on space **1** of the turn counter.

Each player draws **4** cards.

4- PLAYING THE GAME

This game lasts **6** turns.
The combat takes place on a dark night.

The English player must reunite the two combat groups before the end of turn **6**.

If at the end of any Supply Phase, any English unit has traversed the bridge and passed over the river to the side opposite from its deployment zone, the game is over.

5- END OF THE GAME AND VICTORY

English Victory: The English player wins the game if he manages to get one of his units across the river by the end of turn **6.**

PEGASUS BRIDGE : In **Scenario 2**, the German player has no access to his reinforcements.

German victory: The German player wins the game if the English player is does not get one of his units across the river by the end of turn **6**.

PEGASUS BRIDGE :

In **Scenario 2**, the German player has access to his reinforcements.

SCENARIO 2 - BRIEFING

SOUND ASLEEP

While bombers pounded a nearby cement factory as a diversion, gliders land a little bit of everywhere between the two bridges. A young sentry of Slavic origin clearly hears a hard thump, but thinks it a bomber crashing. It is a glider that is merely a few dozen meters from him. He won't even have time to worry, if the Red Devils have anything to say about it...

1- BATTLEFIELD SETUP AND DEPLOYMENT

2- RECRUITMENT OF THE ARMIES

3- PREPARATION

The German player places his 3 Sentries/Decoys (2 Sentries and 1 Decoy) and his Recon Group, as indicated. He places one MG42 in the great defensive position beside the bridge.
He places Oberleutnant Hauser under a Sleeping marker in Bunker A with the detonator.
He places 2 units in Bunker B under Sleeping markers.
He sets the two remaining units aside.

The English player deploys his units in his deployment zone.

Also place **2** bonus tactics.

Remove the following cards from both decks:
Weak Point, Bogged Down, It Bounced Right Off It, Ram, Don't Stop!, Repair, Surprise!, all the **Artillery** and **Aviation** cards.
Also remove the German cards Precision and Booby Trap.

The English player has initiative.
Place the corresponding marker on space **1** of the turn counter.

Each player draws **4** cards.

4- PLAYING THE GAME

This game lasts **6** turns.
The combat takes place on a dark night.

The English player must seize the detonator.
The detonator cannot be moved.

END The game ends if, at the end of a Supply Phase, the English player has a unit in the bunker where the detonator is.

PEGASUS BRIDGE

Turn 4: If the German player won **Scenario 1**, he can bring these three units (reinforcements) into play at the end of the Supply Phase.
A They enter through the spaces indicated by the blue arrows with **A** on them.

At the start of the Supply Phase of the turn following Oberleutnant Hauser being awakened, the two units set aside can be deployed.
They enter through the spaces indicated by the blue arrows with **B** on them.

5- END OF THE GAME AND VICTORY

English victory: The English player wins the game if he has a unit in the same space as the detonator before the end of turn **6**.

German victory: The German player wins if the English player does not have a unit in the same space as the detonator by the end of turn **6.**

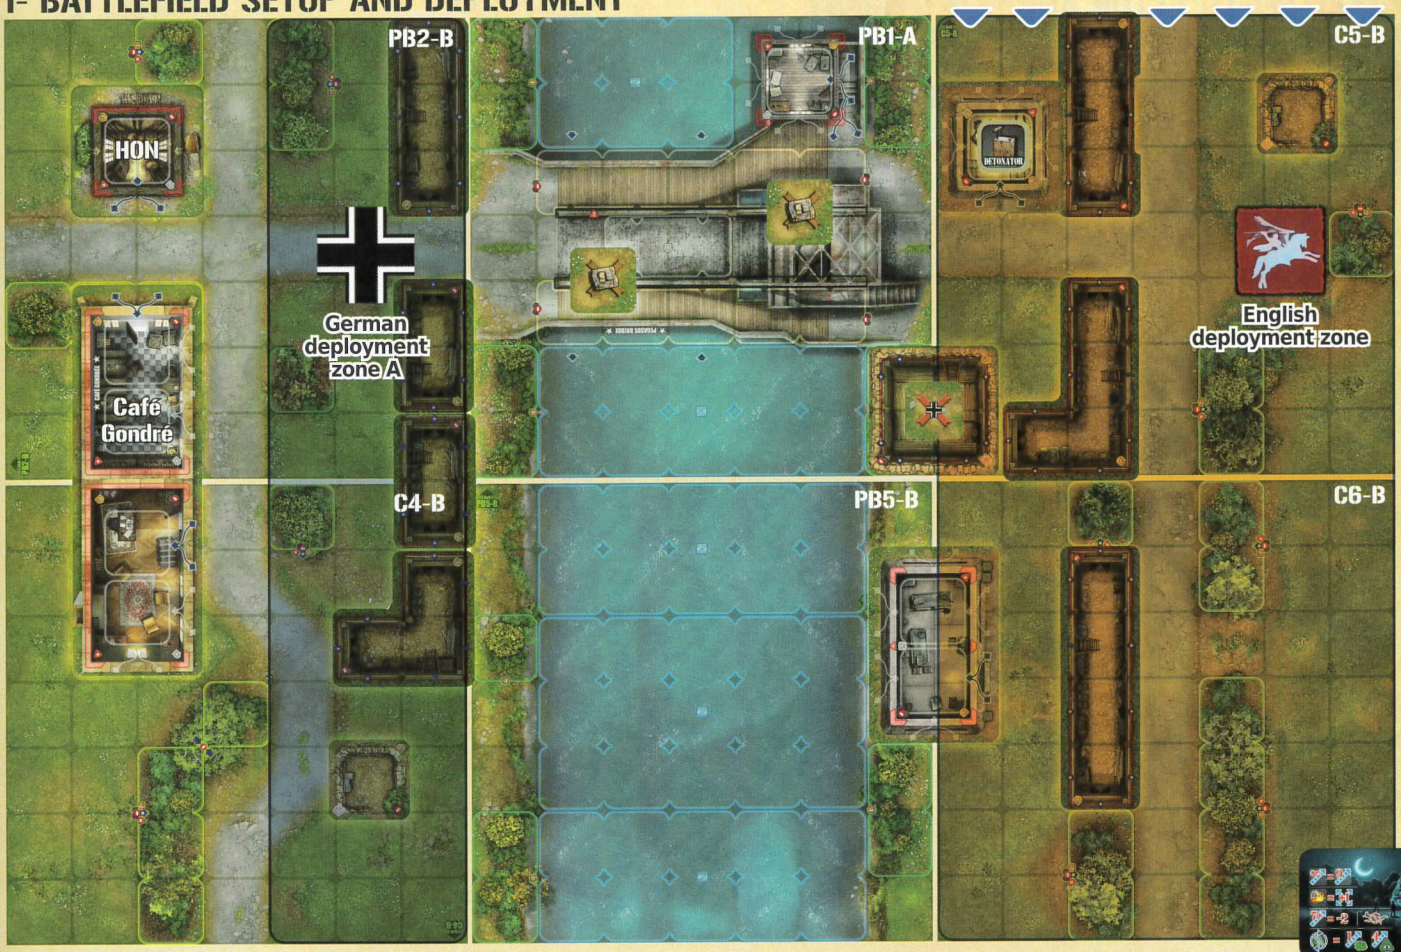
PEGASUS BRIDGE : If the English do not retrieve the detonator, it will be placed again in **Scenarios 3** and **4**, as well as the units (except the officer) that remained uncontested in bunkers.

SCENARIO 3 - BRIEFING

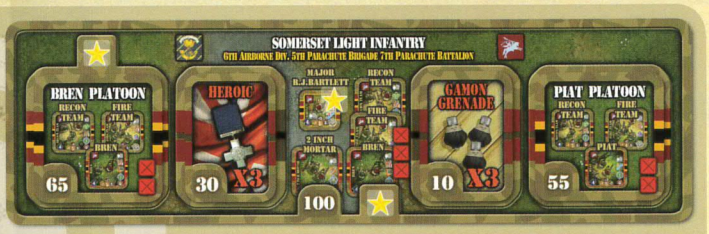
WAKE UP!

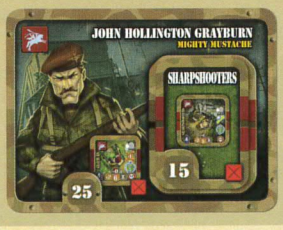
The operation had started in just five minutes. The Red Devils have fallen back to the positions they totally conquered earlier. We must consolidate on this bank before launching the assault on the bridge. The bunker must be captured, and the German soldiers on this side of the canal must be eliminated.

1- BATTLEFIELD SETUP AND DEPLOYMENT



2- RECRUITMENT OF THE ARMIES





Group A

Group B

3- PREPARATION

The English player deploys his units in his deployment zone.
The German player deploys the units of Group **A** in German deployment zone **A**.
He sets aside the units of Group **B**.
No units (English or German) can use the Scout special ability.

Also place **2** bonus tactics.

Remove the following cards from both decks:
Weak Point, Bogged Down, It Bounced Right Off It, Ram, Don't Stop!, Repair, Surprise!, all the **Artillery** and **Aviation** cards. Also remove the German cards Precision and Booby Trap. Also remove the British card Hit and Run.

The German player has initiative.
Place the corresponding marker on space **1** of the turn counter.

Each player draws **4** cards.

4- PLAYING THE GAME

This game lasts **7** turns.
The combat takes place on a clear night.

The German player must control the objective at the end of turn **7**.

Turn 3: The German player can bring the units of Group B into play, either using Order tokens or during the Supply Phase. They arrive in the spaces marked with a blue arrow.

5- END OF THE GAME AND VICTORY

Victory: The German player wins the game if he controls the objective at the end of turn **7**; otherwise, it is an English victory.

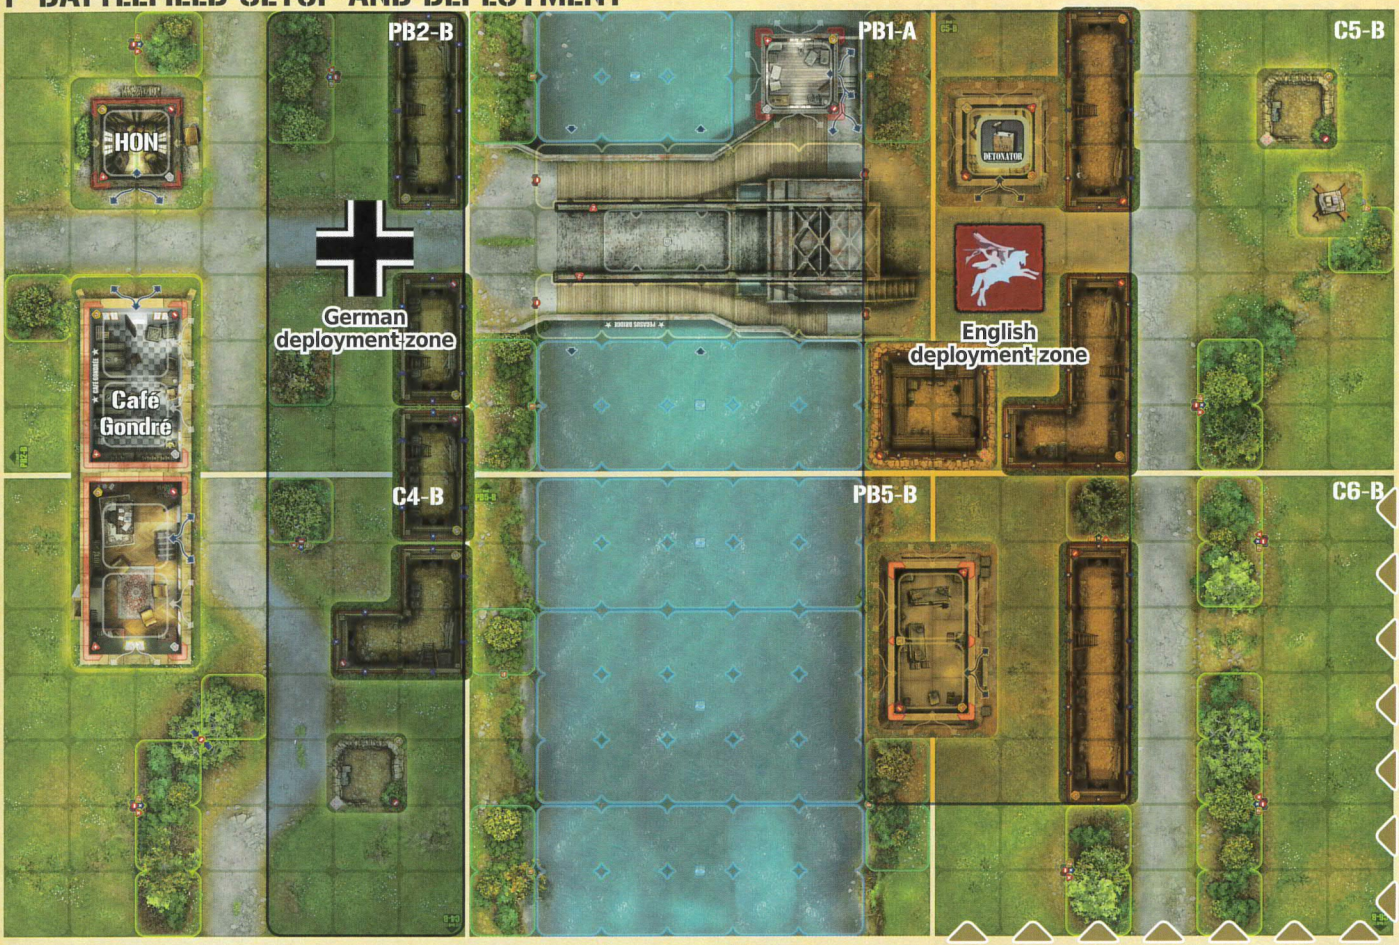
PEGASUS BRIDGE :
If the German player wins this scenario, the English units will enter play in the spaces marked with a brown arrow in **Scenario 4**.

SCENARIO 4 - BRIEFING

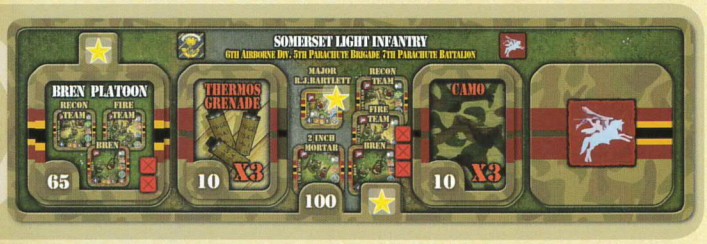
DESTRUCTION...

The Germans, who never had any intention of blowing up Pegasus Bridge, just received new orders. The bridge must be destroyed before sunrise. The best units in this sector are sent to complete this mission....

1- BATTLEFIELD SETUP AND DEPLOYMENT



2- RECRUITMENT OF THE ARMIES



3- PREPARATION

The English player deploys his units in his deployment zone, then the German player deploys his units in his deployment zone.

PEGASUS BRIDGE : If the English player lost the previous scenario, he must bring his units into play on turn **1**, either using Orders or during the Supply Phase, using the spaces indicated with brown arrows, and the German player can deploy three of his units anywhere in the English deployment zone.

Also place **1** bonus tactic.

Remove the following cards from both decks: Weak Point, Bogged Down, It Bounced Right Off It, Hit and Run, Ram, Don't Stop!, Repair, Surprise!, all the **Artillery** and **Aviation** cards.
Also remove the German cards Precision and Booby Trap.

The German player has initiative.
Place the corresponding marker on space **1** of the turn counter.

Each player draws **4** cards.

4- PLAYING THE GAME

This game lasts **7** turns.
The combat takes place on a clear night.

The German player must have a unit in the detonator's space at the end of turn **7**.

5- END OF THE GAME AND VICTORY

Victory: The German player wins the game if he has a unit in the detonator's space at the end of turn **7**. That means the Bridge is destroyed. Otherwise, it is an English victory.

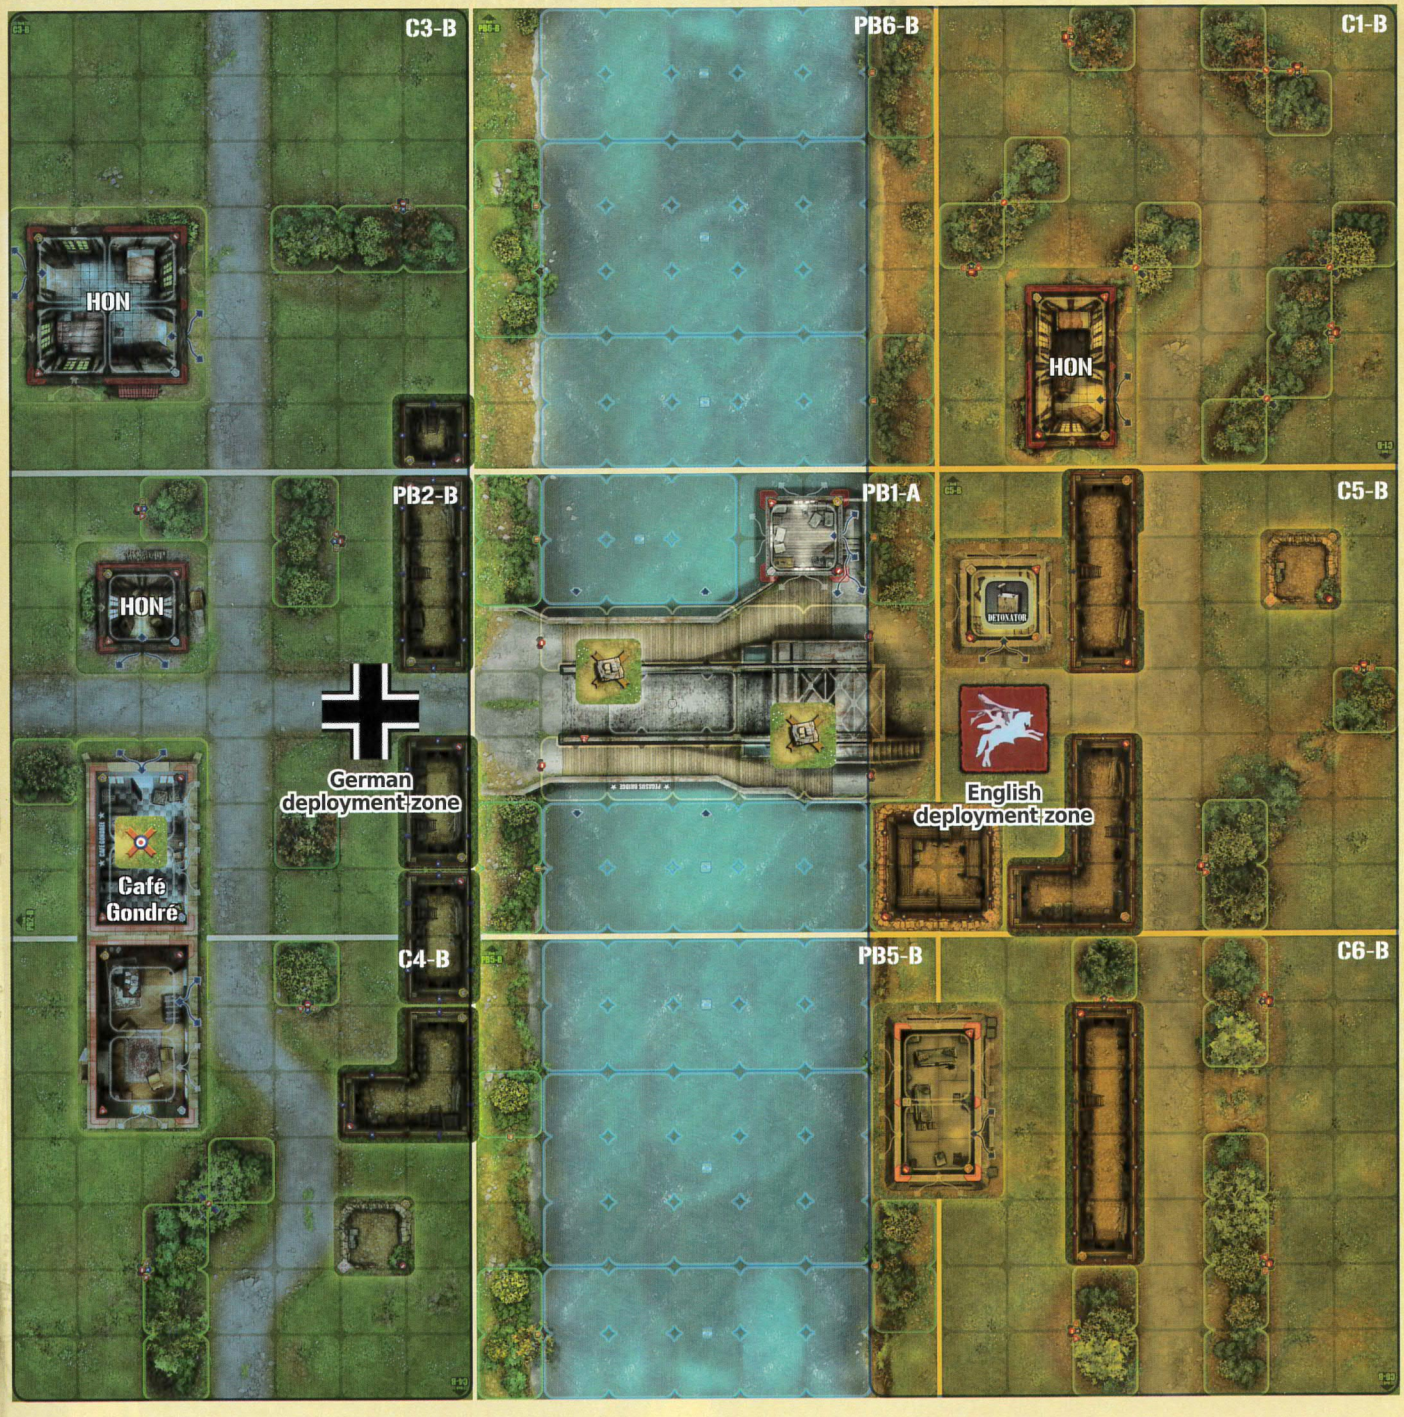
PEGASUS BRIDGE :
If the German player destroys the bridge, place its wreckage in the following scenario.

SCENARIO 5 - BRIEFING

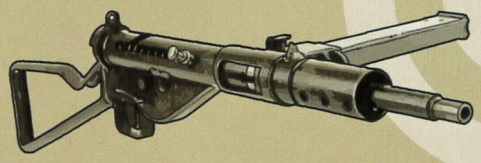
FACE TO FACE

Each camp takes up positions. It is now 10 minutes in, and the battle of the Bénouville Bridge is raging. The English paratroopers don't have a minute to lose. They must take control of the opposite riverbank. The building just on the other side of the bridge would make a perfect Command Post.

1- BATTLEFIELD SETUP AND DEPLOYMENT



2- RECRUITMENT OF THE ARMIES



3- PREPARATION

The English player deploys his units in his deployment zone.

The German player deploys his units in his deployment zone.

Also place **2** bonus tactics.

Remove the following cards from both decks:
Weak Point, Bogged Down, Hit and Run, It Bounced Right Off It, Ram, Don't Stop!, Repair, Surprise!, all the **Artillery** and **Aviation** cards.
Also remove the German card Precision.

Place the **Messerschmitt Bf 109** card beside the turn counter.

The English player has initiative.
Place the corresponding marker on space **1** of the turn counter.

Each player draws **4** cards.

4- PLAYING THE GAME

This game lasts **8** turns.
The combat takes place on a clear night.

The English player must control the objective of the café Gondrée before the end of turn **8.**

END

The game ends as soon as the English player controls that objective.

Turn 5: At the start of the turn, the German player takes the **Messerschmitt BF 109** card into his hand (even if this exceeds his hand limit).

PEGASUS BRIDGE :

If the German player plays the **Messerschmitt BF 109** and the bridge is already destroyed, he applies the text of the card.
If the German player plays the **Messerschmitt BF 109** card and the bridge is not already destroyed, he ignores the AAA die roll, and rolls one die.
He subtracts **1** from the result for each **Bren** unit being on the bridge.
On a result of **5** or **6**, the bridge is destroyed.
Put each unit present on the destroyed bridge back on the wreckage with a Suppressed marker on it.

5- END OF THE GAME AND VICTORY

English victory: The English player wins the game if he controls the objective before the end of turn **8**.

PEGASUS BRIDGE :
If the German player destroys the bridge, place its wreckage in the next scenario.

German victory: The German player wins the game if the English player does not control the objective before the end of turn **8**.

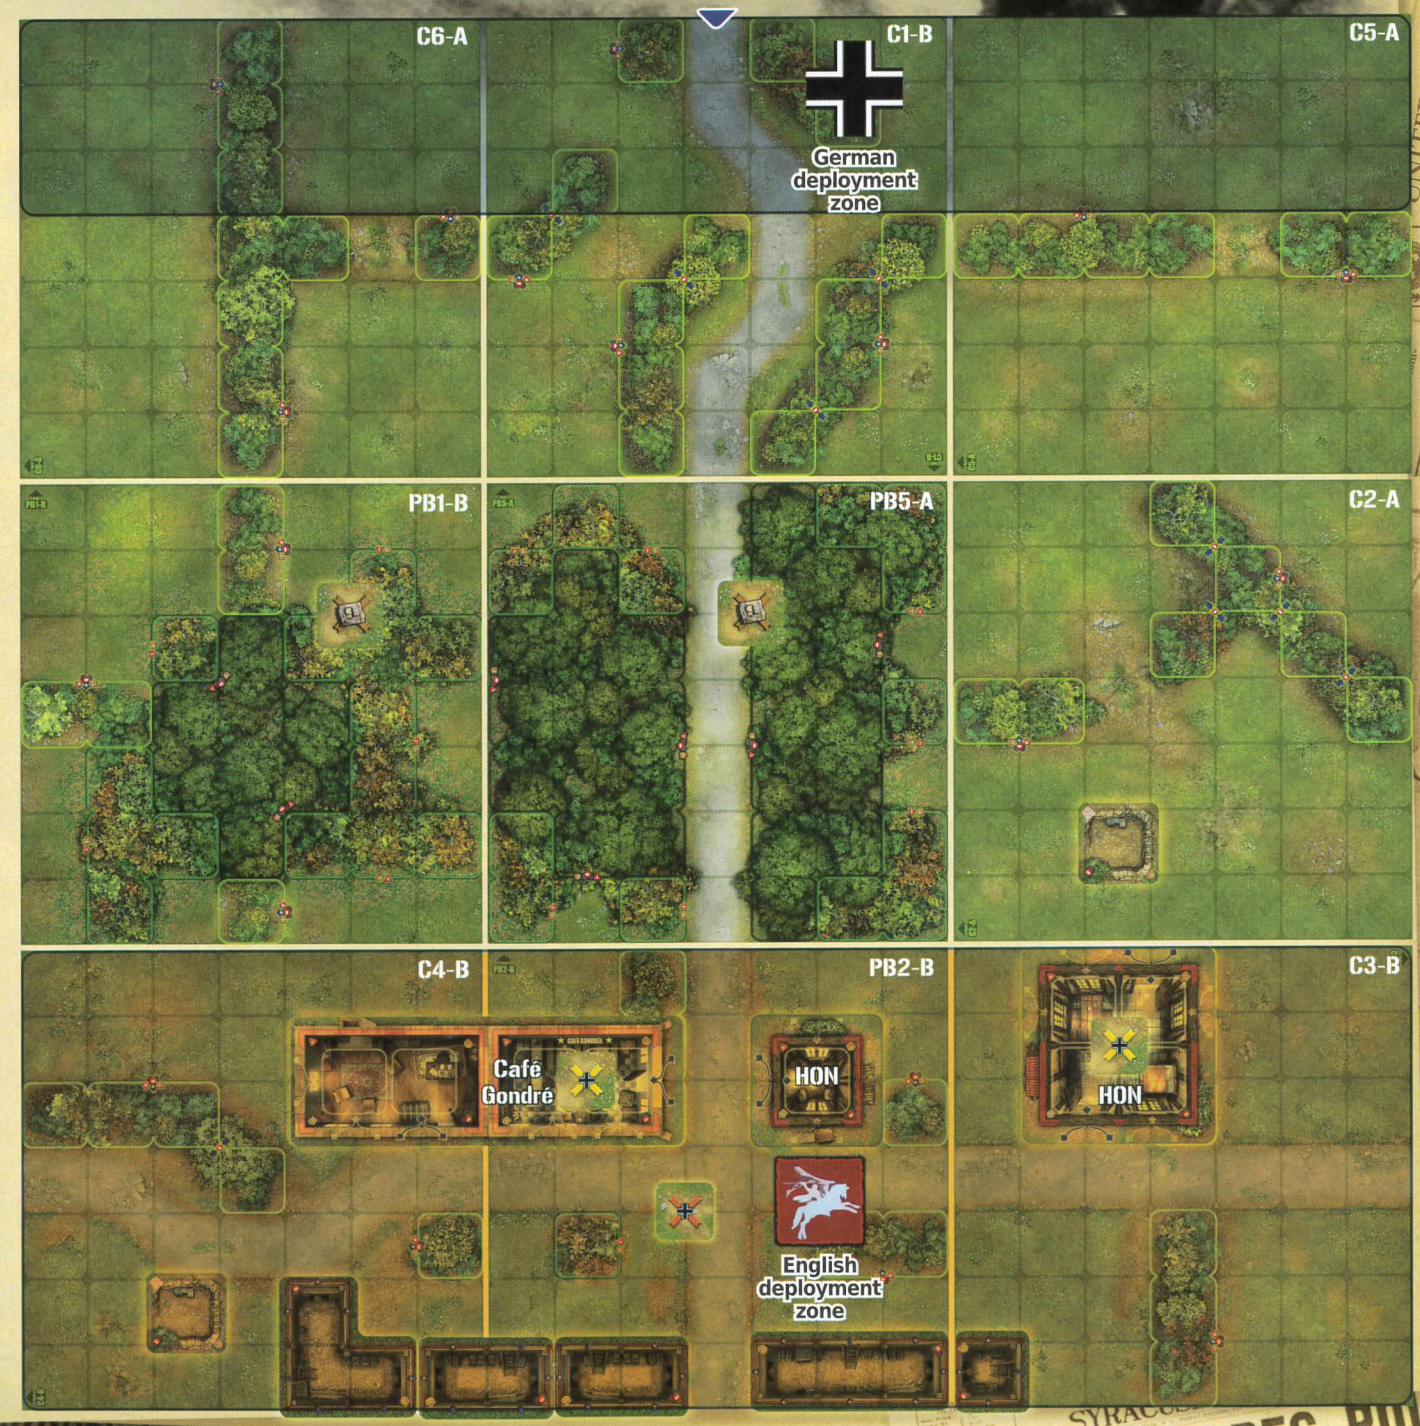
PEGASUS BRIDGE :
In the event of a German victory, the campaign is over.
If the bridge is destroyed, this is a **major German victory.**
If the bridge is intact, it is a **minor German victory**.

SCENARIO 6 - BRIEFING

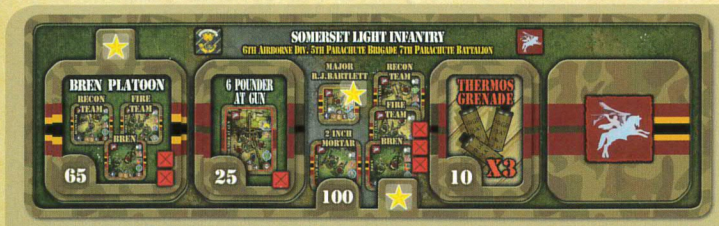
WHILE WE AWAIT THE BAGPIPES

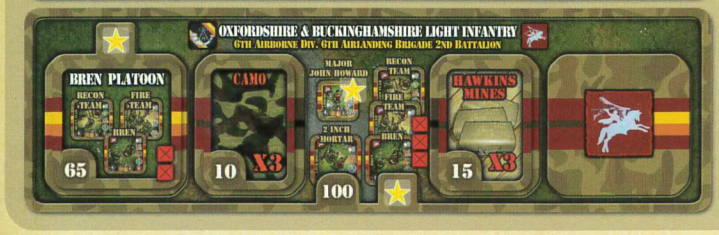
Café Gondrée has been captured. This is the first French building liberated. English paratroopers fortify their positions and await the German counterattack. They must hold out until Lord Lovat's men can relieve them. All ears strain, waiting expectantly to hear the long wailing of Bill Millin's bagpipes.

1- BATTLEFIELD SETUP AND DEPLOYMENT



2- RECRUITMENT OF THE ARMIES





3- PREPARATION

The English player deploys his units in his deployment zone.

The German player deploys his units in his deployment zone.

Also place **2** bonus tactics.

Remove the following cards from the English deck:
Hit and Run, It Bounced Right Off It, Ram, Don't Stop!, Repair, all the **Artillery** and **Aviation** cards.

Remove the following cards from the German deck:
Weak Point, Ram, Bogged Down, Percision, all the **Artillery** and **Aviation** cards.

The German player has initiative.
Place the corresponding marker on space **1** of the turn counter.

Each player draws **4** cards.

5- END OF THE GAME AND VICTORY

English victory: The English player wins the game if he still controls the primary German objective or both secondary objectives at the end of turn **8**.

PEGASUS BRIDGE :
If the bridge is intact, this is a **major English victory**.
If the bridge has been destroyed, it is a **minor English victory.**

German victory: The German player wins the game if he controls the primary objective and at least one of the two secondary objectives before the end of turn **8**.

PEGASUS BRIDGE :
If the bridge has been destroyed, it is a **major German victory.**
If the bridge is intact, this is a **minor German victory.**

4- PLAYING THE GAME

This game lasts **8** turns.

The German player must control the primary objective and at least one of the two secondary objectives before the end of turn **8.**

END

The game ends as soon as the German player controls the primary objective and at least one of the two secondary objectives.

Turn 4: The German player must bring a **Panzer IV** into play, either using an Order or during the Supply Phase, in the space indicated by a blue arrow.
